Incident question

One package appears to be missing from the warehouse shelf. Discover relevant person and package movements, possible carrying and the relevant interval without an incident timestamp. Separate observations from interpretations and do not infer identity, authorization or guilt.

What SENSA reviewed

This export presents sampled evidence. Possible interactions and visual count changes remain separate from physical removal and inventory verification.

Representative timeline

SYNTHETIC missing stock camera 1.mp4 | 4.000 s | before shelf sample

SYNTHETIC missing stock camera 1.mp4 | segment 1 | 9.400-14.100 s | possible carry | UNRESOLVED

Headline episode episode:f7b0d439002714d66138c24771d85703

SYNTHETIC missing stock camera 1.mp4 | 18.100 s | after shelf sample

UNRESOLVED | no confirmed removal or human conclusion in the controlled finding

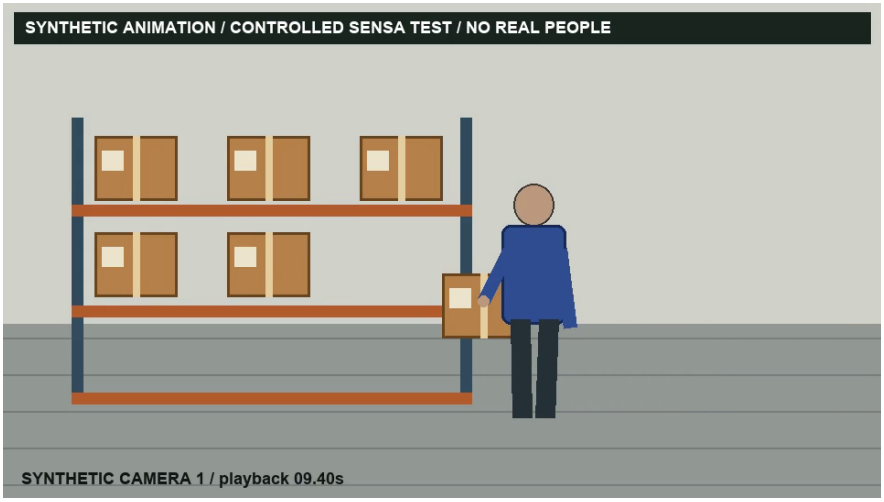

Possible interaction

SYNTHETIC missing stock camera 1.mp4 | segment 1 | 9.400-14.100 s | possible carry | UNRESOLVED

19 unique sampled frames. Repeated model outputs from the same sample are not independent corroboration.

AI interpretation only; object assignment, removal, authorization and guilt are unverified.

SYNTHETIC missing stock camera 2.mp4 | 0.000-12.000 s | unsearched in this run

Times are source-relative. Configured synthetic clocks apply only to the fixture. Physical camera synchronization was not validated. Existing-index coverage does not establish that unsearched intervals contain no relevant activity.

Discovery run provider requests: 0. Previously saved model runs are listed separately.

Model provenance and finding

sam-3.1

Sampled localization and masks. 37 successful saved model records in this snapshot.

muse-spark-1.3

Sampled scene interpretation. 10 successful saved model records in this snapshot.

SENSA derives anonymous associations, aggregates episodes, verifies source identity and computes the count deltas using application logic.

UNRESOLVED

The evidence does not establish removal, identity, authorization or responsibility. Human adjudication is separate.

No human conclusion recorded.

Human finding reviews: 0. Report review: none recorded.
